

TECHNICAL DATA SHEET

RP2120V

FFP2 WELDED SEAM FOLD FLAT RESPIRATOR WITH VALVE

The 2100 series is a fold flat range has the latest filter technology which lowers breathing resistance for wearer comfort. The range is also individually wrapped to ensure maximum hygiene and ideal for PPE dispensing machines

KEY FEATURES

- Betafit RP2120V NR - Highest quality materials and engineering techniques are used to protect the wearer from very fine toxic dust, mist & fume hazards
- Assigned Protection Factor (APF) = 10 x Workplace Exposure Limit (WEL)
- Continuous loop headstrap with toggle adjustment
- Soft inner nose seal that extends across the wearers face for improved fit
- Low profile design which enables the wearer to wear under face / welding shields
- Individually wrapped making it ideal for PPE dispensers
- Approved to EN149:2001 + A1:2009

APPLICATIONS

- Machining (Oil mist)
- Paint removal (Sanding)
- Rust removal (Sanding)
- Site preparation (Demolition)
- Loft insulation work (Fibreglass)
